- Do not play if you are tired or have not had much sleep.
- Make sure that the room in which you are playing has all the lights on and is well lit.
- Stop playing video games for at least ten to twenty minutes per hour. This will rest your eyes, neck, arms and fingers so that you can continue comfortably playing the game in the future.

# PLAYING A GAME

## COIN TOSS

Once you take the field, a coin toss determines which team will kick and which will receive. The coin toss is called in the air by the visiting team. The team who loses the toss chooses which goal they wish to defend.

## KICK OFF

Once the kick meter comes up, press the **A BUTTON** to start the power indicator moving. Press the **A BUTTON** again to select the angle and start the direction indicator moving. Press the **A BUTTON** a third time to select the direction. The kicker will then run up and kick the ball. The kick will be best if the indicators are between the marks.

Follow the same procedure for punts, field goals and extra points.

## CALLING PLAYS

The play select screen is divided into 4 Defensive and 4 Offensive play calling boxes and a game status area showing the current game situation (down, yards to go, time remaining, etc.). If you have created a custom playbook, you can access it from this screen. In multiplayer games, the player with the lowest controller number controls the offense and the next lowest controls the defense.

### To Call a Play

- Scroll formations and plays using **DIRECTIONAL BUTTON** ← or →.
- Press the appropriate control (**A**, **B**, **X** or **Y**) for the formation and play you wish to use.
- Press the **R TRIGGER** to substitute in different play packages for Offense and Defense. Initially, the package will default to the proper one for the formation you chose.

**Offense** Cycle among **NORMAL**, **TWO TIGHT**, **THREE WIDE** and **FOUR WIDE** packages.

**Defense** Cycle among **NORMAL**, **NICKEL** and **DIME** packages. Nickel subs in a defensive back for the middle linebacker. Dime subs in two defensive backs for the middle linebacker and the strong side linebacker.

**Note: L TRIGGER will flip plays.**

Once both teams have called plays, the teams break their huddle and go to the scrimmage line.

## USING A CREATED PLAYBOOK

Once you have created and saved a custom playbook (see page 21), it will be available on your list of playbooks and can be used at anytime (except Quickplay) for any team.

### To use a created playbook

- Access In Game Options on the Game Setup screen.
- Scroll to either the Away Playbook or Home Playbook.
- Press ← or → on the **DIRECTIONAL BUTTON** to highlight the desired playbook.

## CONTROLLING PLAYERS

### Passing

The Pin-Point Passing™ system allows you to control both how hard a pass is thrown and exactly where it's thrown. This allows the quarterback to respond to pass coverage dynamically.

As you drop back to pass, press the **A BUTTON** to show the pass tags (each tag corresponds to a particular receiver). A pin-point passing graphic will appear. The pin-point arrow will point in the direction you hold the analog thumb pad. To throw the pass, press the button that matches your intended receiver. The length of the button press determines the strength of the throw: a **LONG PRESS** will throw a **BULLET**, while a **SHORT PRESS** will result in a **LOB**. Once the ball is thrown, you will have control of the receiver.

## GAME TYPES

### PRACTICE MODE

Let's shake the off-season cobwebs from your offensive game. Start by setting Practice options:

**Offense** Toggle to the team of your choice or offensive scheme of your choice, including classic historic offenses like the '86 Giants and custom schemes of your own devising!

**Defense** Choose to run plays without a defense to challenge you (None), or against any defensive scheme in the NFL!

**Field Pos** Select which yard line you'll run plays from. The UP arrow indicates you're in enemy territory, DOWN that you're in your own half of the field.

**Hashmark** Place the ball at the left, center or right of the field.

**Offense Playbook** Select the offensive scheme of your choice.

**Facility** Choose an Indoor or Outdoor facility. Once you've set your options and chosen which team you wish to control, you'll see the playbook screen, with a number of appropriate plays to choose from. Make your choice, then it's on to the field to master your attack!

## EXHIBITION

A one game contest between any two teams, Exhibition games don't count towards your record. Many of the screens, features and options available in this mode pertain to other modes, too, so take a moment to learn these basics. After selecting Exhibition, you'll come to the team select screen, showing two teams and their respective NFL rankings in the most important offensive and defensive categories. Toggle through teams by pressing ↓ or ↑ on the **DIRECTIONAL BUTTON**. Alternate team select areas by pressing ← or → on the **DIRECTIONAL BUTTON**.

**Importing a Created Team** If you want to bring a saved custom team into play, press the **R TRIGGER**.

At the Restore Team screen, you can select from any one of 4 created teams.

Once your teams are selected, choose which one you wish to control and get ready for some heavy lifting!

## GAME SETUP SCREEN

Before you hit the field, you can access an array of items on the Game Setup screen, which is similar in every game mode. Some options may not be available, depending on game type and situation. For example, you cannot set weather in a domed stadium or in Season mode.

**Start Game** It's game time!

### IN-GAME OPTIONS

**Weather** In Exhibition mode, set the game conditions in outdoor stadiums, or have the CPU choose (Auto).

**Qtr Length** Set 1, 2, 5, 10 or 15 minute quarters.

**Time of Day** Lets you choose a Day or Night game.

**Difficulty** Play at Rookie, Pro or All Pro skill levels.

**Player Energy** When ON, players' energy diminishes with playing time and activity. Low energy often leads to injuries.

**Clock Speed** Use Realistic, Accelerated or Turbo game clock speeds.

**Player ID** The on screen players can be identified in different ways.

**Injury** When ON, players are automatically subbed out when injured, and remain unavailable until the injury heals.

**Celebrations** Yes, those tedious self-congratulatory displays are here in all their glory!

**Focus on Ref** When ON, the referee is shown whenever a call is made.

# NEW SEASON

Begin at the beginning, and try to lead your team to the top of the heap—Super Bowl victory! Season play offers a wide range of action, both on and off the field. You can play each and every game every week, simulate games and play only the choice matchups, manage your roster, create and import custom players, team and playbooks and plenty more!

## SEASON SETUP

Before you get into the rough and tumble of a season, you need to make a few key decisions.

**Play Pre-Season** This option can be set to ON or OFF. When on, your team will compete in 5 exhibition games before the season begins. You can choose to simulate all the games for a particular week or not.

**Player Development** When ON, this feature tracks each player's performance in several categories during each game and rates them by how they did. Categories reflect the demands of each position. The rating is cumulative, and may result in a player improving from good performances or getting worse from bad performances, with a certain amount of randomness thrown in to keep things honest. This means each player (and each team) brings variable skill levels into future games and seasons. Hence, a team may be great for a few seasons then decline, while another may stink on toast for years and then begin turning things around.

**Player Streaks** We don't mean speedy running. When set to ON, players will get hot or cold depending on their game performance. A great performance one week makes a player more likely/able to pull off great moves in the future, while a poor performance can start a player on a downward spiral towards ineptitude.

## SEASON MENU

After the Season Setup screen, you'll go to the Season Menu, with a complete range of choices. Note that if Pre-Season is set to ON, you'll see the same menu, but your choices will relate to Pre-Season play. Once you've selected a particular option, press the **Y BUTTON** (Help) for control details for that option.

**Weekly Schedule** This screen details all the scheduled pre-season or season games week by week. You can play or simulate any of the games for any given week.

**Team Schedules** View a list of each team's schedule, along with win/loss record for any weeks already past.

**Team Standings** View teams standings within each conference and division to date.

**Power Rankings** Which team has the horsepower to go all the way? Power rankings give you a good indication!

**Season Stats** If you like numbers, here's gridiron Nirvana! All the stats you can stand, updated as the season progresses.

**Season Leaders** See at a glance who the top performers in all stat categories are.

**Team Stats** Complete team stats for the season thus far.

**Injured Players** If injuries are turned ON, a visit here will tell you the current status of injured players on any team.

**Weekly Matchups** Compare the rankings of each pair of teams scheduled to play on a given week.

**Manage Rosters** Draft, trade, and sign players and access custom creation features. See Manage Rosters (page 18) for details.

**Quit Season** Quit the current season and return to the main menu. Doing so will cause you to lose any unsaved season information.

# PLAYING A SEASON

Once you've selected which game(s) you wish to play or simulate (using the Weekly Schedule option), press the **A BUTTON**. The computer will simulate any games you didn't mark to play. You will then go to the controller select screen, where up to 4 players can decide which team they wish to control (by moving their controller under the team's logo). If you've marked multiple games to play in any given week, they are played in the order presented.

## GAME SETUP

After selecting which team you wish to control, the Game Setup screen appears. Here you can set various options (these apply only to the current game). Select Start Game and press the **A BUTTON** to begin playing.

## NEW PLAYOFFS

Why wait til' January for intense playoff excitement? Playoff levels from wild card all the way to the Super Bowl. If you revel in the pressure of must-win playoff games, you will love scaling this super-tough ladder to the top.

While the computer determines the Playoff teams and ladder, you may import a Created Team into the 1st tier of the Playoffs.

You can play all games in the playoffs, play only the games featuring a particular team, or have the computer simulate games.

- Select New Playoffs at the NFL Play screen to begin a new playoffs series. Doing so will delete any previously started Playoffs from the internal RAM (NOT from your Memory card).
- Select Continue Playoffs to pick up a previously saved series from where you left off. This series must first be loaded at the Save/Load screen.

### To select Playoff games

- ← or → to scroll playoff ladder.
- ↓ or ↑ to move highlight to a particular matchup box.
- **X BUTTON** to mark a highlighted matchup for play. The computer will simulate any matches not marked for play.
- **A BUTTON** to play games.

**Note: If you press the A BUTTON without marking any matchups for play, you will be asked if you wish to have the computer simulate all games for that week.**

Following Playoff game selection, you will go to the Controller screen to select a team to control.

## SIMULATIONS

On the Main Menu, choose Historic Simulation or Custom Simulation.

**Historic Simulation** All the great contests of yesteryear are back for you to enjoy! Classic crunch fests abound, including moments from all previous Super Bowls! Each historic sim situation is explained, and then you're given the chance to test your gridiron guts and know-how in a mad re-write of history. You can play as either team, but follow the onscreen challenge to earn win status!

**Custom Simulation** If only they'd made that field goal...completed that pass... stuffed that quarterback! What if the '67 Chiefs could play the '96 Patriots? Now you don't have to dream about what might have been, YOU can make it happen! Create some history of your own in Custom Simulation mode. You select the teams, the situation, everything but the ticket prices!

# COACHING TIPS & HINTS

1. Follow the play diagrams, especially on running plays. If you don't follow the pattern, you are liable to run smack into a defender—big trouble!
2. Take some time to master the controls for different play situations. Advanced players know that a juke or a spin can make the difference between the goal line and a 4th down punt!
3. Become familiar with your entire roster. If a crucial player is injured, will you have a replacement in mind? Can you pick up a free agent replacement?
4. When controlling a receiver, press the catch button just prior to the ball arriving. Poor timing on a jump catch can lead to an incompleteness or worse—an interception!
5. Make use of Audibles. When the clock is ticking and you find that your opponent has set up perfectly to ruin your play, sticking to the playbook won't put you in the history books. Take some time to master your Hyper Audibles and you'll gain an advantage.
